You'll see clarification, additional information, and links for external pages

# **READ THIS FIRST**

#### IMPORTANT SAFETY INSTRUCTIONS

#### SAVE THESE INSTRUCTIONS

#### LETHAL VOLTAGE MAY BE PRESENT IN ANY PV INSTALLATION

- This manual contains important instructions for installation and maintenance of the Tigo Energy® product models TS4-L, TS4-O, TS4-S, TS4-M, TS4-R-M, TS4-R-S, TS4-R-O, ES-GTWY-020, Cloud Connect, Cloud Connect Advanced and related Tigo Energy software applications.
- Risk of electric shock, do not remove cover, disassemble, or repair, no user serviceable parts inside. Refer servicing to qualified service personnel.
- Before installing or using the Tigo Energy® System, please read all instructions and warning markings on the Tigo Energy products, appropriate sections of your inverter manual, photovoltaic (PV) module installation manual, and other available safety guides.
- Failure to adhere to these instructions may result in injury or death, damage to the system or voiding the factory warranty.
- To reduce risk of fire and shock hazard, install this device with strict adherence to National Electric Code (NEC) ANSI/NFPA 70 and/or local electrical codes. When the photovoltaic array is exposed to light, it supplies a DC voltage to the Tigo Energy® Module Maximizer™. The Module Maximizers and Smart Modules start in the "ON" state and their output voltage may be as high as the PV module open circuit voltage (Voc) when connected to the module. The installer should use the same caution when handling electrical cables from a PV module with or without the Tigo Energy Module Maximizer attached.

- Installation must be performed by trained professionals only. Tigo Energy does not assume liability for loss or damage resulting from improper handling, installation, or misuse of products.
- Remove all metallic jewelry prior to installing the Tigo Energy Module Maximizers or Smart Modules to reduce the risk of contacting live circuitry. Do not attempt to install in inclement weather.
- Do not operate the Tigo Energy Module Maximizers or Smart Modules if they have been physically damaged. Check existing cables and connectors, ensuring they are in good condition and appropriate in rating. Do not operate Tigo Energy Module Maximizers or Smart Modules with damaged or substandard wiring or connectors. Tigo Energy Module Maximizers must be mounted on the high end of the PV module back-sheet or racking system, and in any case above ground.
- Do not connect or disconnect under load. Turning off the Inverter and/or the Tigo Energy products may not reduce this risk. Internal capacitors within the inverter can remain charged for several minutes after disconnecting all power sources. Verify capacitors have discharged by measuring voltage across inverter terminals prior to disconnecting wiring if service is required.
- Service Personnel: Check the voltage of the array after activating the Tigo Energy® PV-Safe™ function on the MMU prior to performing service.
- Always assume Module Maximizers and Smart Modules are in
  "ON" state, or may turn on when restarting.

#### **TS4 PLATFORM: BASE**

This manual covers the installation steps for the Tigo TS4 family of products, both integrated and add-on versions.

Module integrated TS4

GUIDE:

Long Strings

Optimization

Rapid Shutdown

Monitoring

#### WHERE TO BUY:

**CLICK HERE** 

# **TS4 PLATFORM: COVER SELECTION**

TS4-L\*

The TS4 covers contain your module level electronics:

**TS4-O** 

\*TS4-L is available only for the module-integrated TS4

Long Strings

Optimization

Rapid Shutdown

Monitoring

## WHERE TO BUY:

# COMMUNICATION

The Cloud Connect is your data logger and safety control unit. The Gateway is an antenna that communicates with your smart

modules or add-on devices.

It is always recommended to install communication accessories, to utilize the full potential of your TS4, however it is only mandatory in order to enable monitoring and safety features, such as Rapid Shutdown.

#### Select your model of Cloud Connect:

Cloud Connect Advanced and Gateway

#### **ORDERING INFORMATION:**

Cloud Connect Kit comes with:

1 Gateway

1 Power supply: 2 different options:

1. Wall Outlet

2. DIN Rail

Additional Gateways available separately

WHERE TO BUY:

#### **REMINDER:**

When using TS4-O and TS4 -L, Cloud Connect is only required where rapid shutdown and/or monitoring capabilities are needed

# TABLE OF CONTENTS

# 1. SYSTEM OVERVIEW: TS4-B (TS4 BASED MODULES)

#### **DESIGN RULES:**

#### 1 CLOUD CONNECT:

- Up to 7 GTWYs and 360 PV modules
- All Smart Modules in the same string must be assigned to the same CC
- 1 GTWY:
- Up to 120 PV modules
- Modules must be within 10m-15m (33-50 ft.) from the GW, depending on roof topology and material

For further information **CLICK HERE** 

#### CC AND GTWY CALCULATOR:

For the number of CCs and GTWYs required for your project <u>CLICK</u> <u>HERE</u>

# **1. SYSTEM OVERVIEW: TS4-R**

#### **DESIGN RULES:**

#### 1 CLOUD CONNECT:

- Up to 7 GTWYs and 360 PV modules
- All Smart Modules in the same string must be assigned to the same CC
- 1 GTWY:
- Up to 120 PV modules
- Modules must be within 10m-15m (33-50 ft.) from the GW, depending on roof topology and material

For further information **CLICK HERE** 

#### CC AND GTWY CALCULATOR:

For the number of CCs and GTWYs required for your project <u>CLICK HERE</u>

# **1. SYSTEM OVERVIEW & PRODUCT DESCRIPTION**

TS4-M: MONITORING: The TS4-M provides continuous system-wide monitoring for fleets to make customer support and fleet workflow on track

TS4-S: SAFETY: The TS4-S provides the necessary safety and monitoring services required by municipalities

TS4-O: OPTIMIZATION: In addition to safety, monitoring, and PV2.0 synchronization, TS4-O optimizes each PV module when its performance is affected by shade or mismatch

TS4-L: LONG STRINGS: The TS4-L is the complete Smart Module solution. It is ideal for systems requiring fully optimized performance at the module level, monitoring, safety, and longer strings <u>CLICK HERE</u> to see the TS4-L string sizing info.

#### **MORE INFORMATION:**

Click here to learn more, watch a video and see the TS4 platform datasheet.

# 2. INSTALLING GATEWAYS (GTWY)

Gateway attaches to module frame using provided bracket

Locate Gateway near center of array or each sub-array

Connect multiple Gateways in series and leave terminating resistor only in final Gateway.

#### **INSTALLATION:**

- 1. Connect all GTWY cables before powering ON Cloud Connect
- Mount GTWY on back of PV module using provided bracket, or bolt to the racking system
- Powering ON Cloud Connect and preform GTWY test from the Tigo SMART App

RS-485 communication cable is recommended: 2 x twisted pair, sunlight resistant of direct burial.

#### **MORE INFORMATION**

- Connect AC and DC ground wires to DIN rail
- Connect AC power input to power supply

CCA with DC transformer

 Connect DC leads from power supply to CCA

# Click here for the Cloud Connect installation quick start guide

# **CCA LED STATUS INFORMATION**

Auto PV Safe

- A blinking red and yellow LED indicates that the system automatically entered PV-Safe mode.
- User PV Safe
  - A blinking green and yellow LED indicates that PV-Safe mode was activated manually.
- SMART App activity

- A blinking green LED indicates that the mobile app is connected to the CCA and is actively in use.
- Discovery
  - A blinking yellow LED indicates that the CCA is scanning for Gateways and smart modules (part of the commissioning process).

Error

- A solid red LED indicates that the Discovery process failed or that the CCA is not able to connect to the Tigo server. In case of errors, connect to the CCA using the mobile app for more details.
- Warrning
  - A solid yellow LED indicates that: Discovery has not been run, Discovery completed but did not find all expected Gateways or modules, or CCA is not able to upload data. Connect to the CCA using the mobile app for more details.
- System OK

- A solid green LED indicates that Discovery is complete and found all expected Gateways and smart modules, and CCA is able to connect to the Tigo server.
- Power Off / No Status
  - An unlit LED indicates that the CCA is powered off.

#### 4. INSTALLING: TS4-R

Connect the PV cables from the module to the short leads of the TS4-R

# **5. MAPPING AND CONFIGURATION OPTIONS**

\*If using CC (not CCA) you can do this via LCD and buttons, no smart phone needed

# **5. MAPPING AND CONFIGURATION OPTIONS**

\*If using CC (not CCA) you can do this via LCD and buttons, no smart phone needed

# 5. MAPPING

Remove 1 barcode sticker from the TS4 junction box or TS4-R add-on

Place the sticker on the map, string list or construction drawing, in the exact position you are going to place modules in the field or on the roof.

Place PV modules in a way matches the map you made using barcodes.

Also record the serial numbers of the GTWY(s)

#### **TEMPLATES:**

Create your site map using Tigo's string list template

To view and download, **CLICK HERE** 

Another option is to first map your site online (see next page). At the end, you'll be able to download a physical map of your system to help map the barcodes

MAKE SURE you take the TS4 junction box's label or the TS4-R label, NOT the PV module's

#### **5. ONLINE CONFIGURATION**

To configure a system go to <u>www.tigoenergy.com</u> and select "Sign In"

LOGIN

You can either use your existing Tigo account, or create a new one by pressing "New Installer" at the top

6. COMMISSION

DOWNLOAD THE TIGO SMART APP

## Go to the App Store or Google Play and search for 'Tigo SMART' Download the app and open it once the

Using a Cloud Connect with LCD and buttons and wish to commission without the app? <u>Click here</u>

ENTER YOUR USERNAME AND

PASSWORD, AND PRESS 'LOGIN'

Requires active mobile data connection

This is the same username and password created for the online configuration at:

https://installations.tigoenergy.com/base/login/

#### PRESS 'INSTALLATION'

Requires active mobile data connection

- To proceed with a new installation, select 'Setup New System'
- Select 'Service Existing System' to service a Cloud Connect that has already been configured

#### **CONFIRM SYSTEM SIZE**

Requires active mobile data connection

## **CONFIRM CONFIGURATION**

Requires active mobile data connection

 Since you already scanned barcodes and configured the system online, select 'Yes' and then connect your Smartphone to the Cloud Connect hotspot to proceed

# **CONNECT YOUR SMARTPHONE TO THE**

**CLOUD CONNECT VIA WI-FI** 

- Enable Wi-Fi in your Smartphone settings (requires to leave the app, but don't close it)
- Locate a Wi-Fi network named SM-XXXXXXXXXXX and connect to it
- Press 'Connect' to continue

# **NEXT STEP: SETUP INTERNET**

# CONNECTION

- Select your preferred method of connecting to the internet:
  - Wired: using Ethernet cable
  - Wireless: Using Wi-Fi

# SELECTING WIRED INTERNET

# CONNECTION

- Open up the following screen
- The app will look for an available internet connection automatically
- Scroll down and press 'Test and Continue'
- Wired connections can be configured for Dynamic (DHCP) or Static IP in the app

# SELECTING WIRELESS INTERNET

# CONNECTION

- Opens up a screen showing the available wireless Internet connections
- Make sure you have the name and password for the home network
  - Please note that WPS is not supported by the Cloud Connect
- After selecting a wireless network press 'Test and Continue'

# NETWORK TEST WILL RUN FOR SEVERAL

## SECONDS

- The Network Test can diagnose problems
  with the Internet connection
- Please note that when the Cloud Connect is mounted inside a metal enclosure, it may not receive a Wi-Fi signal unless the antenna is mounted outside of the enclosure.
  - Extension cables for the Wi-Fi antenna and a matching cable gland can be purchased from Tigo, P.N. 006-90029-00.

#### AND END UP WITH THE FOLLOWING

SCREEN

Requires direct Wi-Fi connection to Cloud Connect

Press 'Continue'

Requires direct Wi-Fi connection to Cloud Connect

 To complete the configuration for an existing system ID, select the available Cloud Connect from a map of nearby systems\* or select 'Create New System' to create a new system ID

\*Map requires Location enabled on Smartphone

## **DISCOVERY OF GATEWAYS AND MODULES**

Requires direct Wi-Fi connection to Cloud Connect

After the Gateways have been found, you can continue to view status while discovery is running in the background

### **ONCE DISCOVERY IS COMPLETE**

Requires direct Wi-Fi connection to Cloud Connect

You'll see a confirmation that:

- Discovery Status: Complete
- All modules have been found (e.g. 40 of 40)
- All Gateways have been found (e.g. 1 of 1)

# PRESSING CONTINUE GOES TO STATUS PAGE

- At this point the configuration process is almost complete
- Sync now uploads all the information collected so far to the Tigo Cloud (this happens automatically as well)
- Press 'Discovery Details' to make sure discovery process has found all Smart Modules

#### **DISCOVERY DETAILS**

- Once the Discovery process is complete, this screen will appear and display real time data collected from the Smart Modules, Gateways, and neighboring Smart Modules
- Expand the menus to view data

**DISCOVERY DETAILS:** 

**USE THE 'MODULES' SCREEN TO** 

**COMPLETE COMMISSIONING** 

Requires direct Wi-Fi connection to Cloud Connect

Use the power (P), voltage (V), and current (I) views to make sure the smart modules are properly connected

< Back	SMART	Tigo
	Modules	Θ

## PRESSING 'BACK' WILL RETURN TO STATUS PAGE

Requires direct Wi-Fi connection to Cloud Connect

Press 'Continue'

## AND YOU'RE DONE!

**TIGO EQUIPMENT COMMISSIONING** 

COMPLETE

- Once discovery completed, after pressing "Continue" you'll be prompted to the following screen
- Pressing "Done" will bring you to the "Installation" or "Monitoring" page. You may leave the app and close it at this point

#### MAPPING, CONFIGURATION AND COMMISSIONING SUMMARY

- Collect all TS4 barcodes, use a <u>string list</u> template or any other method to make sure your barcodes are well organized
- Complete the online configuration on a PC or MAC before attempting Discovery
- Perform a Network Test, Gateway Test, and Discovery for each Cloud Connect or Cloud Connect Advanced while on site
- View test results and Discovery progress using your app
- Once Discovery is complete, the Cloud Connect or Cloud Connect Advanced will begin sending data to the Tigo cloud

# 7. RAPID SHUTDOWN

TS4-L, TS4-O, and TS4-S with Cloud Connect/Cloud Connect and Gateway are a solution to meet NEC 2014 690.12 Rapid Shutdown requirements, when combined with a DC disconnect at the inverter.

When Rapid Shutdown is initiated, the voltage across PV conductors will drop below 30V within 10 seconds at the module level.

Rapid Shutdown is activated by taking 2 simple actions.

#### To activate rapid shutdown (with most inverters order of actions doesn't matter):

- 1. Switch off DC disconnect as well to disconnect capacitors.
- 2. Switch OFF AC main to deactivate system.

In the inverter's box you'll find 2 red labels to mark the Rapid Shutdown equipment. Place one sticker next to the inverter's DC switch and the other on the AC main breaker. **Both labels must be visible!** 

Only a properly installed, configured, and tested system will perform Rapid Shutdown properly.

CLICK HERE for more info about Rapid Shutdown

# 8. CONNECTING MODBUS DEVICES (OPTIONAL)

#### **INSTALLATION:**

- Verify device settings for AC meter, inverter, etc. in its own installation manual
- Connect devices to RS-485 port on CC or CCA (note: similar devices can be connected in series)
- 3. Contact Tigo Tech Support to activate a connected device

1.408.402.0802 ext. 2 00800.CALL.TIGO(2255.8446) support@ligoenergy.com

#### **RECOMMENDED SETTINGS:**

- 9600 baud rate
- 8 bits data
- 1 stop bit
- No parity
