

We care! Since 1975.

Service without compromise.

Kyocera Solar supplies high-quality photovoltaic modules with a long service life.

We provide a perfectly tailored all-round range of services: we offer installers, architects, solar engineers and construction planners a comprehensive spectrum of support and assistance measures, from planning and implementation right through to regular performance

controls. Regular training ensures that our expert advisers can always provide up-to-date information.

We care! With our service portfolio, you are always on the safe side.

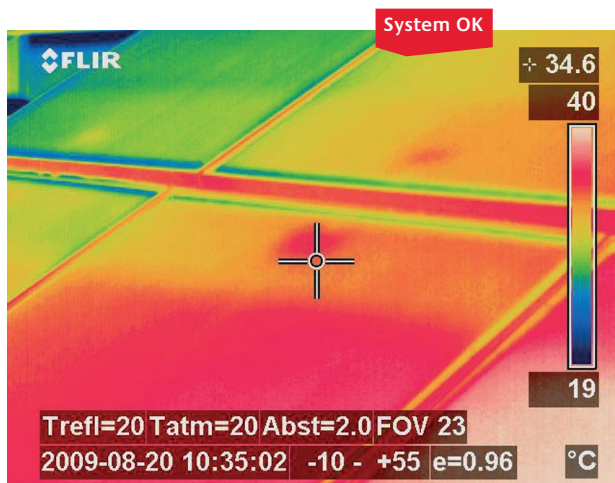

Kyocera Solar provides a wide range of services for installers and solar consultants.

Optimum use of the photovoltaic system is a prerequisite for maximising the efficiency and durability of the modules. It thus makes sense to take advantage of our extensive range of services:

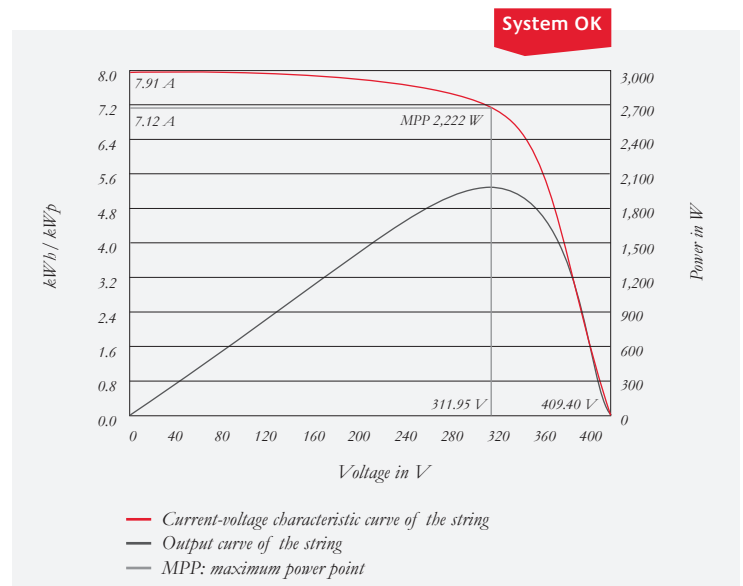

- Support before and during commissioning: site selection, system selection, optimised installation, etc.
- Monthly recording and analysis of yield.
- Regular on-site control of the system and its performance.
- Use of special Kyocera Solar measuring devices for performance control purposes.
- Thermal imaging of modules and the system to localise faults in case of malfunctions.
- Fault analysis and rectification in co-operation with the installer. Please do not hesitate to contact us if you have any problems.
- Tailored services can also be requested for your system.

Infrared measurement

Infrared measurement

Characteristic curve measurement

You can benefit from our services in many ways.

There are many arguments in favour of using our range of services:

- Manufacturers know their products down to the smallest detail and that is why manufacturer-specific services are to our clients' best advantage.
- Use of our range of services increases the operational safety of your system.
- Regular controls allow for early identification and rectification of faults.
- Optimum system-compatibility services considerably increase the life expectancy of your photovoltaic system.

If you require individual advice, please do not hesitate to contact us.
