## SUNNY TRIPOWER CORE2

Flexible system design and highest yields thanks to integrated features

Flexible system design for larger commercial PV systems: The Sunny Tripower CORE2 is the ideal inverter for decentralized system structures up to the megawatt range. With 110 kilowatts, 24 strings and 12 MPP trackers, the Sunny Tripower CORE2 allows for a particularly high solar coverage during the day in ground-based PV systems as well as at different roof pitches in the course of the day. The integrated SMA ShadeFix software solution automatically optimizes system performance anytime, even with partially shaded modules. The automatic monitoring service SMA Smart Connected also ensures maximum PV system yields by detecting failures as fast as possible.

With the Sunny Tripower CORE2 as a central component of the SMA Energy System Business, installers and PV system operators will benefit from the high-quality components from a single source and future-proof options to expand their systems by SMA storage solutions.
