

# NEW EV CHARGING SOLUTIONS

AMTRON® PROFESSIONAL+

# Ten years of eMobility.

Electric Vehicles are growing in popularity faster than ever and are about to become mass market. After 10 years of experience with charging systems and components for Electric Vehicles, we are introducing a new product line with integrated 3G / 4G for communication to a backend.

of eMobility with MENNEKES

# AMTRON® Professional+ Integrated 3G/4G.

AMTRON® Professional+ with integrated 3G/4G for data transmission according to OCPP 1.6j is aimed primarily at private and semi-public customers who, for example, are using a company car and want to bill their employer for charging energy consumed at home, require 'smart' charging controlled by the energy supplier or grid operator, or want to implement contracting models.

The integrated 6mA DC fault current detection and the handling advantages due to the integrated cable suspension complete the solution.

The practical cable management, the simple user interface and the robust plastic housing are just a few of the distinctive features of one of the most successful wall boxes on the market.

- + Integrated 3G/4G for data communication according to OCPP 1.6j
- + Choice of Type 2 socket or 7-metre Type 2 tethered cable, each with 22kW maximum power (lower ratings supported)
- + User interface via LED indicator panel
- + Authorisation via RFID card or backend (e.g. via an App)
- + MID certified energy meter
- + DC leakage detection
