## Troubleshooting SolarEdge Systems, Addendum (Europe \& APAC)

This addendum is a supplement to the SolarEdge Installation Guide versions 3.0 and above (P/N MAN-01-00057-3.0 and above;
http://www.solaredge.com/sites/default/files/se-inverter-installation-guide.pdf). This document describes error codes and how to troubleshoot them.

## Error Codes

The error messages include an error number (in firmware version 3.18xx and before) or a code (in firmware version 3.19xx and later) and a description:

```
Error Code XXX
(3\timesD2)
Error Code 3xD2
<Line 1>
<Line 2>
```

XXX: The error number (firmware version 3.18xx and before).
(\#-X\#): A code indicating the source of error and the error information (firmware version 3.19xx and later).
Line 1-2: Error description
The error numbers/ codes may differ depending on the inverter type (single phase or three phase) as described in the table below. For troubleshooting errors that are not listed, contact SolarEdge support.
Make sure to have this information at hand when contacting SolarEdge Support for advanced troubleshooting.

## WARNING!

All warnings and cautions in this manual should be adhered to while troubleshooting an error

| Error \# Single Phase Inverter |  | Error \# Three Phase Inverter |  | $\begin{gathered} \text { LCD } \\ \text { Message } \end{gathered}$ | Cause and Troubleshooting |
| :---: | :---: | :---: | :---: | :---: | :---: |
| CPU v3.18xx and before | $\begin{gathered} \text { CPU v3.19xx } \\ \text { and later } \end{gathered}$ | $\begin{array}{\|c\|} \hline \text { CPU v3.18xx } \\ \text { and before } \end{array}$ | CPU v3.19xx and later |  |  |
| $\begin{aligned} & 4,5,8,18- \\ & 23,39,42, \\ & 45,48 \end{aligned}$ | $\begin{aligned} & 2 \times 13,2 \times 15, \\ & 2 \times 16,3 \times 2, \\ & 2 \times 2 \mathrm{D}, 3 \times F \end{aligned}$ | $\begin{aligned} & 45,48,50- \\ & 53,94,107- \\ & 111,113 \end{aligned}$ | $\begin{aligned} & 3 \times 2,3 \times F, 8 \times 11- \\ & 8 \times 13,8 \times 3 D, \\ & 8 \times 4 \mathrm{~A}-8 \times 4 \mathrm{E}, \\ & 8 \times 50 \end{aligned}$ | SW Error | Contact SolarEdge Support. |
| N/A |  | 112 | $8 \times 4 F$ | Wrong AC connection | Switch between L1 and L2 or L2 and L3 connections |
| 9, 13 | 2x9, 2xD | N/A |  | AC Current Surge Vac surge | Ground current surge. <br> - Check the AC connection to the inverter <br> - Check with the grid operator if a large surge source or irregular load exists near the site. <br> - If the grid does not have problems contact SolarEdge support. |
| 10, 37, 38 | $\begin{aligned} & 2 \times \mathrm{A}, 2 \times 25, \\ & 2 \times 26 \end{aligned}$ | 76, 77, 90 | $\begin{aligned} & 8 \times 2 B, 8 \times 2 C, \\ & 8 \times 39 \end{aligned}$ | Ground Current - RCD | Ground faults may occur due to insufficient insulation to the ground. <br> WARNING! <br> ELECTRICAL SHOCK HAZARD. Do not touch uninsulated wires when the inverter cover is removed. <br> Only a qualified technician should handle this problem, and only after taking proper precautions. <br> 1. Turn the inverter ON/OFF switch to OFF. <br> 2. Wait five minutes for the input capacitors to discharge. <br> 3. Disconnect the AC breaker. <br> 4. Disconnect the DC inputs. <br> 5. Connect each DC string separately, turn the AC and the inverter ON/OFF switch to ON, until the error appears for the faulty string. <br> - Do not connect strings with a grounding fault to the inverter. A certified installer must fix the faulty string before connecting it to the inverter <br> - For further documentation, contact SolarEdge Support. |
| 14 | 2 xE | 58/59/60 | $\begin{array}{\|l} 8 \times 19 / 8 \times 1 \mathrm{~A} / \\ 8 \times 1 \mathrm{~B} \end{array}$ | AC Voltage Too High (Line 1/2/3) | AC voltage surge. If the fault persists: <br> - Check the AC connection to inverter. <br> - Verify that the inverter is set to the correct country. <br> - Check with the grid operator if a large surge source or irregular load exists near the site. <br> - Verify that the output wire size matches the distance between the inverter and the location of the grid connection. <br> - Use a larger gauge wire for the AC output. <br> - Refer to the AC Wiring Application Note at http://www.solaredge.com/files/pdfs/application-note-recommended-wiring.pdf |

| Error \# Single Phase Inverter |  | Error \# Three Phase Inverter |  | $\begin{gathered} \text { LCD } \\ \text { Message } \end{gathered}$ | Cause and Troubleshooting |
| :---: | :---: | :---: | :---: | :---: | :---: |
| $\begin{array}{\|c\|} \hline \text { CPU v3.18xx } \\ \text { and before } \\ \hline \end{array}$ | $\begin{gathered} \text { CPU v3.19xx } \\ \text { and later } \end{gathered}$ | $\begin{array}{\|c\|} \hline \text { CPU v3.18xx } \\ \text { and before } \end{array}$ | CPU v3.19xx and later |  |  |
| 15 | 2xF | 85, 86, 88, | $\begin{aligned} & 8 \times 34,8 \times 35, \\ & 8 \times 37 \end{aligned}$ | DC Voltage Too High (surge) | The SolarEdge system normally eliminates DC overvoltage errors. If the fault persists: <br> - Turn OFF the inverter ON/OFF switch. If after five minutes, the LCD panel does not show a low safety voltage ( 1 V per optimizer), check which string is malfunctioning and recheck its connections to the inverter. <br> - Proceed according to Power Optimizer Troubleshooting <br> - Re-commission all inverters in the site, as described in Commissioning the Installation. |
| $\begin{aligned} & 16,149 \\ & 153,181 \end{aligned}$ | $\begin{aligned} & 2 \times 10,2 \times 95, \\ & 2 \times 59,2 \times B 5 \end{aligned}$ | $\begin{aligned} & \hline 95,106, \\ & 125,126, \\ & 161,162, \\ & 166,172- \\ & 175 \end{aligned}$ | $\begin{aligned} & 8 \times 3 \mathrm{E}, 8 \times 49, \\ & 8 \times 5 \mathrm{C}, 8 \times 5 \mathrm{D}, \\ & 8 \times 75-79,8 \times 7 \mathrm{~A}- \\ & 7 \mathrm{~F}, 8 \times 80-83 \end{aligned}$ | Hardware Error | Contact SolarEdge Support. |
| 17 | 2x11 | $\begin{aligned} & \text { 104, 163- } \\ & 165 \end{aligned}$ | 8x47, 8x77-79 | Temperature Too High | Over temperature <br> - Verify proper inverter clearances. <br> - Make sure the heat-sink fins are clean and unobstructed. |
| 24 | 2x18 | 120 | $8 \times 57$ | Faulty Temp. Sensor | Broken or unconnected temperature sensor. Contact SolarEdge Support. |
| 25 | 2x19 | 121 | $8 \times 58$ | Isolation Fault | PV solar array is not properly isolated from ground earth. <br> - Check the PV installation for isolation problems and ground leakage. <br> - Only a certified PV installer must fix the faulty string before connecting it to the inverter. <br> - Referto $\qquad$ troubleshooting.pdf |
| 26 | 2x1A | 122 | $8 \times 59$ | Faulty AC Relay |  |
| 28 | 2x1C | 124 | 8x5B | RCD Sensor Error | ct SolarEdge support. |
| 29, 30 | 2x1D, 2x1E | N/A |  | Phase Balance Error | - Check the grid connection. <br> - Check the GND connection. <br> - Check the L1, L2 and Neutral connections. <br> - Verify symmetric load between L1, and L2 . <br> - Consult the local grid authority. |
| 31,33 | 2x1F, $2 \times 21$ | 64/65/66 | $\begin{aligned} & 8 \times 1 F / 8 \times 20 / \\ & 8 \times 21 \end{aligned}$ | AC Voltage Too High (Line 1/2/3) | Grid voltage is above the country limit. <br> - Verify that the inverter is set to the correct country. <br> - Turn OFF the inverters in the site and verify AC grid voltage. <br> - If the inverter is located far from the connection point to the grid, use a larger gauge AC wire. <br> - Consult the grid operator. <br> - If permitted by local authorities, change the grid protection values. |
| 32,41 | 2x20, $2 \times 29$ | $\begin{aligned} & \text { 61/62/63, } \\ & 67 / 68 / 69 \end{aligned}$ | $\begin{aligned} & 8 \times 1 \mathrm{C} / 8 \times 1 \mathrm{D} / \\ & 8 \times 1 \mathrm{E} \\ & 8 \times 22 / 8 \times 23 / 8 \times 24 \end{aligned}$ | AC Voltage Too Low | - Verify that the inverter is set to the correct country. |
| 34 | 2x22 | 79/80/81 | 8x2E/8x2F/8x30 | AC Freq Too High (Line $1 / 2 / 3$ ) | - Consult the grid operator. <br> - If permitted by local authorities, change the grid protection values. |
| 35 | 2x23 | 82/83/84 | 8x31/8x32/8x33 | AC Freq Too Low (Line 1/2/3) |  |
| 36 | 2x24 | 72/74/75 | 8x27/8x29/8x2A | DC Injection (Line 1/2/3) | Contact SolarEdge support. |
| 40 | 2x28 | N/A |  | Islanding | Grid is down. When AC grid voltage returns the inverter will restart after the reconnection time. <br> If the problem persists, consult with the grid operator. |
| 44 | 2x2C | 44 | 3xB | No Country Selected | Select the country |
| 46 | $3 \times \mathrm{A}$ | 46 | $3 \times \mathrm{A}$ | Phase Unbalance | Select Power Control $\rightarrow$ Phase Balance $\boldsymbol{\rightarrow}$ Disable. |
| N/A |  | 70 | $8 \times 25$ | VLL Max | Voltage too high <br> - Verify that the inverter is set to the correct country. <br> - Consult the grid operator. <br> - If permitted by local authorities, change the grid protection values. |
| N/A |  | 71 | $8 \times 26$ | VLL Min | - Verify that the inverter is set to the correct country. |

## System Warnings

Warnings are displayed in the initial status screen with the format: <Warning X>. For example:

| Vac[V] Vdc [ V | Pac[ W] |
| :---: | :---: |
| 1.0 0.5 | 0.0 |
| P _ OK: XXX/YY | < S_OK > |
| Warning 8 | O N |

The warning is a status screen. To view the warning description, press the LCD button.
The following is a list of system warnings:

| Warning \# |  |  | LCD text |
| :--- | :--- | :--- | :--- |
| CPU v3.18xx and <br> before | CPU v3.19xx and <br> later |  | Comments and troubleshooting |
| $1-4,6-7$ | $8 \times 66-8 \times 69$ <br> $8 \times 6 A-8 \times 6 F$ | Fan \# Failure | Clean or replace the fan |
| 5 | Turn Switch Off to Configure | Appears when trying to access the Setup menus during <br> production |  |
